## Fishery and morphometric relationships of the banded guitarfish, *Zapteryx exasperata* (Elasmobranchii, Rhinobatidae), from the Gulf of California, Mexico

María Pilar Blanco Parra, Fernando Márquez Farías & Felipe Galván Magaña

The banded guitarfish (*Zapteryx exasperata*) is a commercially-important species in the Northwest artisanal ray fishery of Mexico. However, very little information about its fisheries characteristics and catch abundance is available. Seasonal sampling was conducted between 1998
