Symposium 4

printer-friendly

Materials Characterization MRS Proceedings Volume 1242 (Buy This Book)

Editors: Ramiro Pérez Campos, Antonio Contreras Cuevas, and Rodrigo A. Esparza Muñoz

Below are the published proceedings articles from Symposium 4 from XVIII International Materials Research Congress 2009.

All visitors have access to the article abstracts.

MRS Members (login for access) and those with institutional access may view the complete article by selecting the "View Paper" button beneath each article. (**NOTE:** "View Paper" will only appear for logged-in users with the appropriate access.)

Non-Members can purchase individual articles by selecting the "Purchase Paper" button beneath each article.

Suggested format for citation of papers in this volume: List all author names: Title of article, in *Materials Characterization*, edited by Ramiro Pérez Campos, Antonio Contreras Cuevas, and Rodrigo A. Esparza Muñoz (Mater. Res. Soc. Symp. Proc. **Volume 1242**, Warrendale, PA, 2010).

Electron Microscopy Characterization of Humidity Ball-Milling AlCuFe Intermetallic Powders S4-04

Authors: C. Patiño-Carachure, O. Téllez-Vazquez, A. Bedolla-Jacuinde, R. Esparza, C. Ángeles-Chávez, R. Perez and G. Rosas

1242: Materials Characterization

This volume is a compilation of papers presented at Symposium 4, *Materials Characterization*, held at the XVIII International Materials Research Congress 2009 in Cancun, Mexico. The symposium was co-organized by the Sociedad Mexicana de Materiales (MRS-Mexico) and the Materials Research Society (MRS). These proceedings offer materials scientists from around the world a common platform to exchange their findings and discuss developments, and begin collaborations at the national and international

levels. Topics include: materials characterization by X-ray diffraction, infrared spectroscopy, scanning electron microscopy and transmission electron microscopy; characterization of pipeline steels used in the oil industry; characterization of nanostructured materials; microstructural characterization of welding and joining of materials; materials characterization for biomedical applications; materials characterization for industrial applications; materials characterization by photoacoustic and photoluminescence techniques; and microstructural characterization of stainless steels. 2010, hardcopy, 33 papers, 241 pages. *This volume is available electronically on the MRS Web site, with FREE access for all current MRS members.*

Volume 1242
