Anthropogenic and authigenic uranium in marine sediments of the central Gulf of California adjacent to the Santa Rosalía mining region. Archives of Environmental Contamination and Toxicology, 63(3): 309-322. DOI: 10.1007/s00244-012-9776-1

## Anthropogenic and authigenic uranium in marine sediments of the central Gulf of California adjacent to the Santa Rosalía mining region

Evgueni Shumilin, Griselda Margarita Rodríguez Figueroa, Dmitry Sapozhnikov, Yuri Sapozhnikov & Konstantin Choumiline

To investigate the causes of uranium (U) enrichment in marine sediments in the eastern sector of the Gulf of California, surface sediments and sediment cores were collected adjacent to the Santa Rosal

Palabras clave: Anthropogenic, Authigenic Uranium Marine Sediments
